

TABLE OF CONTENTS

Overview	1
Chapter 1 - About These Materials	3
This Book	3
Programming 4th Dimension: The Ultimate Guide	3
The 6.5 Upgrade Manual	3
Code	3
Formatting Conventions	4
Getting In Touch	4
Errata	4
Thanks!	4
Chapter 2 - Overview of 4D 6.5	5
Introduction	5
Overview	5
Design Environment and Development Process Improvements	6
Language Improvements	7
Improved User Interface Tools	8
New and Improved Debugging and Analysis Tools	9
Improved Performance	9
New and Improved Set and Selection Tools	10
New and Improved Web and Internet Tools	11
Chapter 3 - Converting to 4D 6.5	13
Overview	13
Default Conversion	13
Conversion Style	14
Recommended Conversion Strategy	16
The Conversion Procedure	17
Converting From Versions Earlier Than 4D V6	18
Special Note	19
Chapter 4 - A 4D Developer's Toolkit	21
Overview	21
A Word About These Product Suggestions	22
4D Compiler	22
4D Insider	23
4D Server	23
4D Tools	23
DataCheck	24
SanityCheck	24
QuickCode Pro	24
4D Write 6.5	24
4D Internet Commands	25
ITK	25
AG Net Tools	25
EtherPeek	26
OTSessionWatcher	26
PhotoShop	26
Canvas	26
ResEdit	27

Table of Contents

Design Environment and Development Process Improvements	29
Chapter 5 - Opening a Database	31
Overview	31
History List	31
Open Database Options	32
Chapter 6 - 4D Tools 6.5	35
Overview	35
Checking the Structure File	35
Repairing the Structure File	37
4D Tools and SanityCheck	38
Checking the Data File	42
4D Tools 6.5 and DataCheck	44
Chapter 7 - Structure Editor Improvements	53
Overview	53
Contextual Menus	53
Viewing Alpha Lengths	57
Confirming New Table Creation	58
Chapter 8 - Explorer Comments	61
Overview	61
Explorer Comments	61
Automatic Comments	63
Comment Support	64
4D Insider	65
Chapter 9 - Find in Design	67
Overview	67
Find In Design: Quick Tour	67
Working With the Results Window	69
The Find History List	69
Find Types	70
Find Options	71
The Find Editor, 4D Insider and SanityCheck	72
4D Insider	73
SanityCheck	74
Chapter 10 - Form Editor Improvements	77
Overview	77
Property List	77
Form Properties	80
Contextual Menus	82
Display Options	83
Tools	87
Alignment Editor	88

Chapter 11 - Method Editor Improvements	93
Overview	93
Integrated Help	93
Syntax Checking	95
Break Points	95
QuickCode Pro 3.5	96
QuickCode Pro 4.0	100
Chapter 12 - 4D 6.5 Picture Library	107
Overview	107
Graphics Library	107
Picture Editor	108
Multiple-Frame Pictures	110
Working With Pictures	113
4D 6.5 Companion	118
Technique: Creating Rollover Button Images	120
Background: Bitmap Versus Vector Graphics	122
Chapter 13 - 4D 6.5 Security Options	123
Overview	123
Confirming Password Changes	123
Default User	124
User Environment Access Control	125
Language Improvements	127
Chapter 14 - Custom Constants	129
Overview	129
Why Use Constants?	129
Custom Constants	132
Constants Rules	134
Editing Constants Within 4D	135
Tips and Special Notes	137
Chapter 15 - Execute On Client	141
Overview	141
Example Scenario	141
Sequence of Events and Summary of Commands	142
Automatic Client Registration	143
The REGISTER CLIENT Command	144
Sending a Request	147
The GET REGISTERED CLIENTS Command	148
The Message Queue	149
Alternative Strategies	149
Chapter 16 - Additional Language Changes	151
Overview	151
List Items	151
Semaphore and Test Semaphore	151
Select Folder	153
Open Document	153

Improved User Interface Tools	155
Chapter 17 - Dynamic User Interfaces	157
Overview	157
Animation	157
Resizable Forms and Form Objects	159
Data Driven Solutions	160
Chapter 18 - New and Improved Form Events	163
Overview	163
On After Keystroke	163
SET TIMER and On Timer	166
On Resize	169
On Clicked and On Double Clicked	169
Chapter 19 - New Form Features and Commands	171
Overview	171
Dynamic Titles	171
Active Objects in Output Headers	174
HIGHLIGHT RECORDS	175
Open form window	177
GET FORM PROPERTIES	178
Object Text Color	180
Chapter 20 - Moving and Resizing Objects	181
Overview	181
Native Command Summary	181
Extended Command List	184
Background: 4D's Object Coordinate System	188
Background: Form Object Names and Object References	189
Chapter 21 - Splitters	193
Overview	193
Splitters in Action	193
Splitters in the Design Environment	194
Splitters in Code	197
Saving and Restoring Splitter Position	198
Chapter 22 - Context-Sensitive Help	199
Overview	199
Integrating Help	199
Integrating Help With Forms	201
OPEN WEB URL and Help	202
Help in the 4D 6.5 Companion Database	204
Context Sensitive Tooltips	205
Creating Effective Help	206

New and Improved Debugging and Analysis Tools 209

Chapter 23 - Writing Code with Fewer Bugs 211

Overview	211
Ask the Method Editor to Check Your Code	211
Use the Debugger Defensively	212
Scan for Errors With SanityCheck	212
Compile With "All variables are typed."	212
Pay Attention to Case Structures	213
Print Routines	215
Have Someone Else Read Your Code	215
Notice and Correct Habitual Mistakes	216
Code Defensively	216
Test Pointers	218
Make Each Routine Perform One Task	218
Focus on Processes, Not Personalities	218
Learn About and Adopt Techniques That Work	219

Chapter 24 - Handling Errors 221

Overview	221
Range Checking	221
LOG EVENT	222
Error Handling with ON ERR CALL	222
Error Handling Routines in the 4D 6.5 CompanionDatabase	223

Chapter 25 - The 4D 6.5 Debugger 225

Overview	225
When Should You Use the Debugger?	225
The Debugger and Its Parts	226
New Information in the Watch Pane	227
Moving Parts of Lines into the Expression Area	228
Saving Debugger Settings	229
Debugging Multiple Processes	229
Breaking into the Debugger	229
Break Points	230
Catching	233

Chapter 26 - The 4D 6.5 Runtime Explorer 235

Overview	235
Basic Features	235
Watch Pane	236
Process List Pane	238
Break Pane	239
Catch Pane	239

Improved Performance 241

Chapter 27 - 4D 6.5 Optimization 243

Overview	243
What Is Faster	243
How Much Faster Is 6.5?	244
Why 4D 6.5 Is Faster	245

Table of Contents

Chapter 28 - New Index Options	247
Overview	247
Background	247
Inside a 4D Index	249
Controlling the Entries per Index Node (Or: "What does that slider do?")	251
Fast Mode Versus Traditional Mode	254
Index Maintenance	256
4D 6.5 Index Optimizations	257
Chapter 29 - Tuning Database Parameters	259
Overview	259
Reading and Writing Parameters	259
Sequential and Indexed Operations	260
Database Parameter Descriptions	262
Database Parameter Editor	266
Chapter 30 - Rethinking 4D Optimization	269
Overview	269
Build Fewer Indexes	269
Build Indexes on the Fly	269
Sort on Multiple Fields Freely	270
Use DISTINCT VALUES	270
Use QUERY WITH ARRAY	270
Use RELATE ONE SELECTION and RELATE MANY SELECTION	270
New and Improved Set and Selection Tools	271
Chapter 31 - Import and Export	273
Overview	273
Import and Export: Common Changes	273
The New Import Editor	277
Importing Tips	280
IMPORT DATA	281
Importing and Triggers	283
The New Export Editor	284
EXPORT DATA	287
Chapter 32 - New and Improved Query Commands	289
Overview	289
DISTINCT VALUES	289
RELATE ONE SELECTION and RELATE MANY SELECTION	291
QUERY WITH ARRAY	292
Find Index Key	294
Chapter 33 - New Set and Selection Commands	295
Overview	295
Conversion	295
Moving Selections Between Workstations	297
Special Notes	297

New and Improved Web and Internet Tools	299
Chapter 34 - Overview of 4D Internet Integration	301
Overview	301
Popular Applications for 4D Internet Integration	302
4D Internet Tools Comparison	302
4D Internet Tool Descriptions	303
Web Serving and 4D	305
4D Based CGI Solutions	306
Web Serving: Special Notes	307
Integrating Email	308
Integrating FTP	309
Development Aids	309
Special Note: 4D Client Port Number	310
4D Web Development Tips	310
Chapter 35 - The 4D 6.5 Web Server	313
Overview	313
Background: Statelessness and Statefulness	313
Contextual Mode	315
Non-Contextual Mode	318
Semi-Dynamic Pages	320
Chapter 36 - The 4D 6.5 Web Security Options	325
Overview	325
Password Options	325
Log Request	331
Chapter 37 - 4D Internet Commands	333
Overview	333
Sending and Receiving Email	333
Uploading and Downloading Files with FTP	336
Managing TCP/IP Sessions Directly	337
Ping, Name Lookup, and Other Internet Utilities	337
