

# TABLE OF CONTENTS

<b>Introduction</b>	<b>1</b>
<b>Chapter 1 - About This Book</b>	<b>3</b>
What's In The Package? .....	3
Why Learn 4D? .....	3
4D Versions Covered .....	4
What Should You Know to Get Started? .....	5
Who Are You? .....	5
Organization .....	6
Source Code, Examples, and Code Libraries .....	7
Conventions Used in This Book .....	10
Getting In Touch .....	10
<b>Chapter 2 - 4D V6 For 4D 3.x Users</b>	<b>11</b>
Quick Look .....	11
Terminology Changes .....	11
Improvements in 4D V6 .....	12
Significant New Features in V6 .....	14
Migrating from 3.x to V6 .....	15
Database Conversion .....	15
The Conversion Procedure .....	16
<b>Structure</b>	<b>19</b>
<b>Chapter 3 - Normalization</b>	<b>21</b>
Quick Look .....	21
What is Normalization? .....	21
Why Do They Talk Like That? .....	22
Design Versus Implementation .....	22
Normalized Design: Pros and Cons .....	23
Terminology .....	23
Normal Forms .....	25
Denormalization .....	27
Further Reading .....	28
<b>Chapter 4 - Field Types</b>	<b>31</b>
Quick Look .....	31
4D's Field Types .....	31
Bits and Bytes .....	32
What Difference Does Size Make? .....	33

## Table of Contents

---

String Types .....	33
Numeric Types .....	34
Specialized Types .....	34
Fat Types .....	35
Converting Field Types .....	36
<b>Chapter 5 - Subtables</b> .....	<b>37</b>
Quick Look .....	37
What Are Subtables? .....	37
What To Avoid .....	37
The Future of Subtables .....	38
Using Subtables for Keyword Systems .....	38
Why Are Subtable Queries So Fast? .....	40
How Many Subrecords Are Too Many? .....	40
<b>Chapter 6 - Fat Tables</b> .....	<b>41</b>
Quick Look .....	41
Fat Fields .....	41
Example .....	42
A Generic Solution .....	42
Notes About Specific Field Types .....	44
Trade-Offs .....	44
<b>Chapter 7 - Indexes</b> .....	<b>45</b>
Quick Look .....	45
Defining An Index .....	45
What Is an Index? .....	46
Index Type .....	46
When Indexes Are Required .....	46
Index Benefits .....	46
Index Costs .....	46
<b>Chapter 8 - About Relations</b> .....	<b>47</b>
Quick Look .....	47
4D Relations .....	47
What Is a Relation? .....	48
Orphans and Broken Links .....	48
Relations Without Relations .....	49
Commands That Require Relations .....	50
<b>Chapter 9 - Using Relations</b> .....	<b>51</b>
Quick Look .....	51
Automatic vs. Manual Relations .....	51
When Automatic Relations Execute .....	52
Benefits of Automatic Relations .....	53

Benefits of Manual Relations .....	55
Automatic vs. Manual Relations Revisited .....	55
The AUTOMATIC RELATIONS Command .....	56
<b>Chapter 10 - BLOBS</b>	<b>57</b>
Quick Look .....	57
What Is a BLOB? .....	57
BLOBs in 4D .....	57
Storing External Documents .....	60
Saving Variables and Arrays .....	61
Custom Data Structures .....	62
Example .....	65
Document Your BLOBs .....	65
Meta-Headers .....	66
<b>Selections</b>	<b>67</b>
<b>Chapter 11 - Address Tables</b>	<b>69</b>
Quick Look .....	69
What Is an Address Table? .....	69
Address Tables and Record Sort Order .....	70
Address Table Commands .....	71
A Special Address Table: The Current Selection .....	72
<b>Chapter 12 - Sets</b>	<b>73</b>
Quick Look .....	73
What Is a Set? .....	73
Set Commands .....	74
Set Accuracy .....	77
Set Scope .....	77
<b>Chapter 13 - Managing Selections</b>	<b>79</b>
Quick Look .....	79
Clearing the Current Selection .....	79
Copying, Cutting, and Using Selections .....	80
SET QUERY DESTINATION .....	81
Record Navigation Without Querying .....	81
QUERY .....	82
GOTO RECORD .....	82
GOTO SELECTED RECORD .....	83

## Table of Contents

---

### **Chapter 14 - Optimizing Queries 87**

Quick Look .....	87
Queries and Indexes .....	87
Query Control Commands .....	89
Set Query Limit .....	89
Set Query Destination .....	89
Examples .....	92
Sets .....	92
Named Selections .....	93
Variables .....	94

### **Chapter 15 - Sorting 97**

Quick Look .....	97
How 4D Stores Records .....	97
What Gets Sorted? .....	98
Sorting Records for Display .....	98
Sorting Records "Permanently" .....	98
Sorting Speeds .....	98
About the Tests .....	99
Single-Field Sorts Are Fastest .....	100
Sorting Twice .....	100
Indexes Improve Single-Field Sort Performance .....	101
4D Client Can Be Faster Than 4D .....	101
4D Client Can Be Slower Than 4D .....	101
About Indexes .....	101
Formula-Based Sorts .....	102
Sorting Fields and Complex Sorts .....	103
Compilation and Sort Speed .....	104
Sort Direction and Sort Speed .....	104

### **Chapter 16 - RELATE ONE SELECTION and RELATE MANY SELECTION 105**

Quick Look .....	105
Command Usage .....	105
Command Parameters .....	106
The Free Join Package .....	108

### **Chapter 17 - SCAN INDEX and REDUCE SELECTION 111**

Quick Look .....	111
Introduction .....	111
SCAN INDEX .....	111
REDUCE SELECTION .....	112
Summary Fields .....	112

<b>Chapter 18 - ARRAY TO SELECTION</b>	<b>113</b>
Behavior of ARRAY TO SELECTION .....	113
Creating Records .....	114
Modifying Records .....	114
<b>Chapter 19 - SELECTION TO ARRAY</b>	<b>119</b>
Quick Look .....	119
Selective Downloading .....	119
Example .....	119
SUBSELECTION TO ARRAY .....	120
Using SELECTION TO ARRAY .....	121
<b>Interface</b>	<b>123</b>
<b>Chapter 20 - Input Forms</b>	<b>125</b>
Quick Look .....	125
Keep the Form as Small as Possible .....	125
Load Single Copies of Graphics .....	126
Load Objects Selectively .....	128
Preload Objects .....	129
Structure Form Method Code Efficiently .....	130
<b>Chapter 21 - Output Forms and Subforms</b>	<b>135</b>
Quick Look .....	135
4D Server Automatic Optimization .....	135
It's Slower the First Time .....	136
Output Forms Are Like For Loops .....	136
Minimize the Number of Detail Objects .....	136
Minimize the Size and Usage of Graphics .....	137
Use Automatic Relations For Related-One Tables .....	137
Save Calculated Data Once .....	137
Use Simple Form Methods .....	138
Use the On Load Trigger Sparingly .....	140
Avoid Check Boxes .....	141
<b>Chapter 22 - User Perception</b>	<b>143</b>
Quick Look .....	143
User Expectations .....	143
Listen to Your Users .....	143
Understand Human Perception .....	144
Use Animation During Lengthy Operations .....	145
Focus on Frequently Used Operations .....	147
Create a Good First Impression .....	147

## Table of Contents

---

<b>Chapter 23 - Startup Speed</b>	<b>149</b>
Quick Look .....	149
User Perception and Startup .....	149
4D Versus 4D Client .....	150
4D's Internal Startup Tasks .....	150
Custom Server Startup Code .....	151
Custom Client Startup Code .....	152
User Startup Method .....	154
<b>Programming</b>	<b>155</b>
<b>Chapter 24 - Compile Your Database</b>	<b>157</b>
Quick Look .....	157
What Compilation Optimizes .....	157
Programming for 4D Compiler .....	158
Why Code Runs Faster .....	159
The Range Checking and Optimization Options .....	161
<b>Chapter 25 - Case Statements</b>	<b>165</b>
Quick Look .....	165
How Case Statements Work .....	165
Avoid Redundant Function Calls .....	166
Put the Most Used Code at the Top .....	168
Use Subroutines .....	169
Isn't This Overkill? .....	169
<b>Chapter 26 - Parameters</b>	<b>171</b>
Quick Look .....	171
Parameters .....	171
Working With Parameters .....	172
Parameter Indirection .....	175
<b>Chapter 27 - Loops</b>	<b>177</b>
Quick Look .....	177
Compile Your Code .....	177
Move Calculations Outside of the Loop .....	178
Reduce the Number of Loops Needed .....	178
Use a For Loop .....	180
How Loops Work .....	180
Use a Longint Counter Variable .....	181

<b>Chapter 28 - Arrays</b>	<b>183</b>
Quick Look .....	183
What Are Arrays? .....	183
Using Arrays Effectively .....	184
Array Commands .....	187
<b>Chapter 29 - Strings</b>	<b>189</b>
Quick Look .....	189
String Concatenation .....	189
String Multiplication .....	189
Data Conversion .....	190
String Lengths .....	190
Defining String Variables and Arrays .....	191
Working With Quotes .....	191
Don't Store Strings in Code .....	193
Absolute ASCII Values .....	196
Direct Character References .....	196
Size Text Blocks Once .....	197
<b>Chapter 30 - Pointers</b>	<b>199</b>
Quick Look .....	199
About Pointers .....	199
Why Pointers Are Confusing .....	200
Working With Pointers .....	204
<b>Chapter 31 - Execute</b>	<b>211</b>
Quick Look .....	211
Background .....	211
Avoid Using EXECUTE .....	212
Embedding Commands Intelligently .....	215
<b>Chapter 32 - Error Handling</b>	<b>217</b>
Quick Look .....	217
Mechanics of Error Handling in 4D .....	217
Types of Errors .....	217
Default Versus Custom Error Handlers .....	220
Advantages of a Custom Error Handler .....	221
Error Manager .....	222

### **Chapter 33 - Database Methods 223**

Quick Look .....	223
Where Database Methods Execute .....	223
On Startup .....	224
On Server Open/Close Connection .....	224
On Exit .....	226
On Server Startup/Shutdown .....	226
On Web Connection .....	227

### **Development 229**

#### **Chapter 34 - Programming Style 231**

Quick Look .....	231
Features of an Effective Style .....	231
Naming Conventions .....	232
Method Structure .....	232
Comments .....	233
White Space .....	233
Comment Control Structures .....	235
Labeled Parameters .....	236
Declare Everything .....	236
Avoid Global Variables .....	237
Keep Methods Short .....	237
Write Design Documentation .....	238
Use Insider Keywords .....	238

#### **Chapter 35 - Optimization Overview 241**

Quick Look .....	241
When to Optimize Code .....	241
Go For Maximum Visible Impact .....	241
Listen to Users .....	242
90% of Processing Time Is Spent in 10% of Code .....	242
The Time-Space Trade-off .....	243
Rethink the Problem .....	243
Work With the Product .....	243
Leave Incremental Optimizations For Last .....	244
Test, Test, Test .....	244

#### **Chapter 36 - Compiler Methods 245**

Quick Look .....	245
About Variable Typing .....	245
Overview of Compiler Typing Options .....	246
Compiler Methods: Rules .....	247
Naming Your Compiler Methods .....	247

Other Benefits of Using Compiler Methods .....	249
Maximize Variable-Typing Efficiency .....	249
Avoid Type Conflicts .....	250
Simplify Multi-Programmer Development .....	250
Avoid Subtle Errors .....	250
<b>Chapter 37 - Testing</b>	<b>253</b>
Quick Look .....	253
Run Simple Tests .....	253
Follow-Up On Unexpected Results .....	254
Examine Your Assumptions .....	254
Save Results .....	255
Run Tests Unattended .....	255
Share Your Results .....	255
Be Mindful of Statistical Significance .....	255
Repeat and Average .....	256
Consider the Hardware .....	256
Retest Periodically .....	256
Be Aware of the State of the 4D Cache .....	256
<b>Processes</b>	<b>259</b>
<b>Chapter 38 - About Processes</b>	<b>261</b>
Quick Look .....	261
Processes Defined .....	261
The 4D Multi-Processing Architecture .....	264
Scheduling and Prioritizing .....	265
<b>Chapter 39 - Local Processes</b>	<b>269</b>
Quick Look .....	269
Typical Uses of Local Processes .....	269
Starting a Local Process .....	270
Why "Local"?	270
Do Not Access Records .....	271
Do Not Communicate With the Server .....	271
Do Not Access Structure Objects .....	271
So What's Left? .....	272
<b>Chapter 40 - Stored Procedures</b>	<b>273</b>
Quick Look .....	273
Appropriate Uses .....	274
Starting a Stored Procedure .....	276
Process Variables .....	276
Stored Procedure IDs .....	276
Communicating With a Stored Procedure .....	278

## Table of Contents

---

Example .....	278
SET PROCESS VARIABLE Versus VARIABLE TO VARIABLE .....	280
Use Stored Procedures Wisely .....	281
<b>Chapter 41 - Hiding Global Processes</b>	<b>285</b>
Quick Look .....	285
Why Hide Processes? .....	285
Coding a Solution .....	285
Memory Usage .....	288
<b>Chapter 42 - General Purpose Processes</b>	<b>289</b>
Quick Look .....	289
Coding a Solution .....	289
The Code .....	290
Disadvantages and Limitations .....	293
<b>4D Server</b>	<b>295</b>
<b>Chapter 43 - 4D Server Optimization Principles</b>	<b>297</b>
Quick Look .....	297
Reduce Network Traffic .....	297
Objects Managed by 4D Server .....	298
Objects Automatically Cached on Client .....	299
Optimize the Server .....	299
<b>Chapter 44 - Record Locking</b>	<b>301</b>
Rules About Record Locking .....	301
Locked Record Alerts .....	302
Working With Records Procedurally .....	302
READ ONLY .....	303
Loading Locked Records Efficiently .....	303
Example .....	303
Generic Routines .....	304
<b>Chapter 45 - Object Locking Using Semaphores</b>	<b>307</b>
Quick Look .....	307
Controlling Access to Objects .....	307
Semaphores .....	308
Object Locking Using Semaphores .....	310

<b>Chapter 46 - 4D Server-Based Commands</b>	<b>313</b>
Quick Look .....	313
Executed on 4D Client .....	313
Executed on 4D Server .....	313
Principles .....	314
Use Server-Based Commands .....	314
Avoid Formula-Based Queries and Sorts .....	316
Avoid APPLY TO SELECTION .....	317
Use Stored Procedures .....	317
<b>Chapter 47 - Server-Executed Code</b>	<b>319</b>
Quick Look .....	319
What Executes on the Server? .....	319
Variables and 4D Server .....	320
Triggers .....	322
Stored Procedures .....	324
Database Methods .....	324
<b>Chapter 48 - Transactions</b>	<b>325</b>
Quick Look .....	325
What Is a Transaction? .....	325
Transaction Commands .....	326
Implementing Transactions .....	326
Transaction Rules and Limits .....	326
Managing Transactions .....	329
<b>Chapter 49 - Batch Workstations</b>	<b>333</b>
Quick Look .....	333
Uses for a Batch Workstation .....	333
Batch Workstations vs. Stored Procedures .....	335
<b>Summary Data</b>	<b>337</b>
<b>Chapter 50 - About Summary Data</b>	<b>339</b>
Quick Look .....	339
The Time-Space Trade-off .....	339
Compound Fields .....	340
Summary Fields .....	340
Summary Tables .....	340
Saved Sets .....	340
Accuracy .....	340

## Table of Contents

---

<b>Chapter 51 - Compound Fields</b>	<b>341</b>
Quick Look .....	341
Save Combined Values .....	341
Conditions for Building Compound Fields .....	342
<b>Chapter 52 - Summary Fields</b>	<b>345</b>
Quick Look .....	345
Benefits of Summary Fields .....	345
Example .....	345
How Much Faster Is This? .....	346
What to Summarize .....	348
<b>Chapter 53 - Summary Tables</b>	<b>349</b>
Quick Look .....	349
The ACME Software Company* .....	349
Other Advantages of a Summary Table .....	355
Cost of Maintaining a Summary Table .....	356
<b>Chapter 54 - Saved Sets</b>	<b>357</b>
Quick Look .....	357
Saving Sets .....	357
Set Accuracy .....	358
Appropriate Uses of Saved Sets .....	358
Maintaining Saved Sets .....	360
Real World Choices .....	362
<b>Data Accuracy</b>	<b>365</b>
<b>Chapter 55 - About Data Accuracy</b>	<b>367</b>
Quick Look .....	367
Data Integrity .....	367
Accuracy Levels .....	368
Chapter Summaries .....	369
<b>Chapter 56 - Perfect Accuracy</b>	<b>371</b>
Quick Look .....	371
When Does Data Change? .....	371
4D 3.x: Rule Enforcement Using a Global Procedure .....	372
4D V6: Rule Enforcement Using Triggers .....	377

<b>Chapter 57 - Periodic Accuracy</b>	<b>383</b>
Quick Look .....	383
Introduction .....	383
Example: Aging Reports .....	384
Post-and-Reconcile .....	384
Partial Reconciliation .....	390
<b>Chapter 58 - Close Enough Accuracy</b>	<b>393</b>
Quick Look .....	393
Decaying Accuracy .....	393
How Accurate Can Your System Be? .....	395
Update Data on Demand .....	396
Batch Processing .....	396
<b>Chapter 59 - Committing a Record</b>	<b>397</b>
Quick Look .....	397
The Record Commit Period .....	397
Forbidden Actions .....	398
Record Validation .....	399
Phase/Event Testing .....	400
<b>Chapter 60 - Triggers</b>	<b>401</b>
Quick Look .....	401
Appropriate Trigger Activities .....	401
Enabling Triggers .....	401
Why Are They Called Triggers? .....	402
The Four Triggers .....	403
Triggers and New Records .....	403
When Triggers Run .....	404
Triggers and Variables .....	404
Triggers and Selections .....	405
Trigger Development .....	406
Trigger Structure .....	406
Rejecting an Action .....	406
Actions to Avoid in a Trigger .....	408
Trigger Optimization .....	408
Triggers and Transactions .....	409
Triggers, Transactions, and Automatic Action Buttons .....	409

<b>Printing</b>	<b>411</b>
<b>Chapter 61 - About Printing</b>	<b>413</b>
Quick Look .....	413
4D's Form-Based Printing Commands .....	413
Manage User Perception .....	414
<b>Chapter 62 - Avoiding Printing</b>	<b>417</b>
Quick Look .....	417
Exports .....	417
Database Publishing .....	417
Web Pages .....	418
E-Mail Reports .....	418
Fax Reports .....	418
<b>Chapter 63 - Print Selection</b>	<b>421</b>
Quick Look .....	421
Don't Make the User Wait .....	421
Typical Steps to Produce a Report .....	422
Minimize Pre-Print Processing .....	422
Minimize Processing During PRINT SELECTION .....	423
<b>Chapter 64 - PRINT FORM</b>	<b>427</b>
Quick Look .....	427
Advantages of PRINT FORM .....	427
Disadvantages of PRINT FORM .....	428
Using PRINT FORM .....	428
<b>Caches</b>	<b>431</b>
<b>Chapter 65 - Caches Introduction</b>	<b>433</b>
Quick Look .....	433
About Caches .....	433
4D Client Caches .....	433
Local Caches .....	434
Server Caches .....	434
<b>Chapter 66 - About Caches</b>	<b>435</b>
Quick Look .....	435
Caches and the Time-Space Trade-off .....	435
Storing Data in a Faster Medium .....	435
Cache Properties .....	436
Caching a Cache .....	438

To Cache or Not to Cache .....	438
Cache Validity .....	438
Other Places Caches Are Used .....	438
Cache Example .....	439
<b>Chapter 67 - 4D Client Caches</b>	<b>441</b>
Quick Look .....	441
Background .....	441
The .res File .....	442
The .rex File .....	446
Mac4DX and Win4DX .....	447
Troubleshooting Technique .....	448
<b>Chapter 68 - Local Caches</b>	<b>449</b>
Quick Look .....	449
What Is a Cache? .....	449
Cache Strategies .....	450
Examples .....	451
Example #1: States and Abbreviations .....	452
Example #2: Product Codes .....	456
Example #3: ZIP Codes .....	459
<b>Chapter 69 - Server Caches</b>	<b>463</b>
Quick Look .....	463
Background .....	463
Centralized Initialization .....	463
Saved Sets .....	464
Live Reports .....	465
<b>Alternative Connections</b>	<b>467</b>
<b>Chapter 70 - Alternative Connection Types</b>	<b>469</b>
Quick Look .....	469
Reasons to Use Alternative Connections .....	469
4D Remote .....	470
4D Open .....	470
Web Browsers .....	470
E-Mail .....	470
Cost/Benefit Summary .....	471
<b>Chapter 71 - 4D Remote</b>	<b>473</b>
Quick Look .....	473
What 4D Remote Optimizes .....	473
Programming for 4D Remote .....	474

## Table of Contents

---

Avoid Downloading Resources with 4D Remote .....	474
Administration .....	474
Using 4D Remote .....	475
Server-Side Hardware .....	475
4D Remote with 4D Open .....	475
<b>Chapter 72 - 4D Open</b> .....	<b>477</b>
Quick Look .....	477
4D Open Products .....	477
Pros and Cons of 4D Open .....	478
Example .....	480
<b>Chapter 73 - Web Clients</b> .....	<b>483</b>
Quick Look .....	483
Background .....	483
Advantages of a Web Browser Interface .....	485
Disadvantages of a Web browser interface .....	486
Appropriate Uses .....	488
Example .....	488
<b>Chapter 74 - E-Mail Interfaces</b> .....	<b>493</b>
Quick Look .....	493
Benefits of E-Mail Integration .....	493
Example .....	497
<b>Background</b> .....	<b>501</b>
<b>Chapter 75 - 4D Gotchas</b> .....	<b>503</b>
Quick Look .....	503
Items Discussed .....	503
ALL RECORDS .....	504
Field Attributes .....	504
SAVE RECORD versus ACCEPT .....	505
Form Events and Automatic Action Buttons .....	505
READ WRITE and READ ONLY .....	506
The Modified and Old Functions .....	506
Active Objects on Output Forms .....	506
Order of Operators .....	507
Line Evaluation .....	507
Math With Objects of Type Real .....	508
Variables C1...Cn .....	508
DELAY PROCESS and PAUSE PROCESS .....	508
Wildcard Character .....	508
String Literals .....	509
Sequence Number .....	509

MacsBug User Breaks .....	509
Sum and Subtotal .....	510
On Exit and On Server Shutdown .....	510
NaNs .....	510
Reserved Words .....	511
Startup and Debut .....	511
Process Versus Interprocess Variables .....	512
4D and Plug-In Methods That Require Parameter Declarations .....	512
<b>Chapter 76 - Resources</b>	<b>513</b>
What is a Resource? .....	513
Abstraction .....	513
Resource Types .....	514
Resource IDs .....	514
Resource Files and the Resource Hierarchy .....	515
Resources and the Windows OS .....	515
Resources and 4D Objects .....	516
Editing Resources .....	516
Resource Editor Templates .....	518
Specific Resources .....	521
Resource Dictionary .....	529
<b>Chapter 77 - Plug-Ins</b>	<b>533</b>
Quick Look .....	533
Advantages of Plug-Ins .....	533
Entry Points .....	534
Synchronous Vs. Asynchronous Plug-ins .....	534
Using Plug-ins .....	535
<b>Code Libraries</b>	<b>537</b>
<b>Chapter 78 - Batch Workstation Code Library</b>	<b>539</b>
About the Example Database .....	539
Example Database Overview .....	539
Extending The System .....	541
Integrating the Batch Workstation .....	542
Command Descriptions .....	543
<b>Chapter 79 - Error Manager</b>	<b>549</b>
Quick Look .....	549
About The Example Database .....	549
Integrating the Error Manager .....	550
Database Overview .....	551
Extending The System .....	552
Command Descriptions .....	553

## Table of Contents

---

### **Chapter 80 - General Code Library 557**

Quick Look .....	557
Integrating the General Code Libraries .....	557

### **Chapter 81 - Free Join 575**

Quick Look .....	575
How the Package Works .....	575
Command Descriptions .....	576
Example .....	577

### **Chapter 82 - Initialization Manager 579**

Quick Look .....	579
Overview .....	579
Memory Management .....	580
Objects .....	580
How the Package Works .....	581
Registering an Object .....	582
The Object Index .....	582
Integrating the Initialization Manager .....	583
Command Descriptions .....	585

### **Chapter 83 - Set Manager 595**

Quick Look .....	595
About The Example Database .....	595
Integrating the Set Manager .....	596
Integrating the Reconcile Sets System .....	597
Command Descriptions .....	597

### **Chapter 84 - Transaction Manager 607**

Quick Look .....	607
Integrating the Transaction Manager .....	607
Command Descriptions .....	609

### **Appendices 615**

#### **Chapter 85 - Changed Command Names 617**

#### **Chapter 86 - Command Execution Speed 619**

Windows NT Server .....	619
Mac OS .....	624

**Chapter 87 - Compiler Declarations 629**

Compiler Declaration Syntax .....	629
Variables and Arrays .....	629
Parameters .....	630
Parameter Indirection .....	631
Plug-in Event Management Processes .....	632
Special V6 Methods .....	632

**Chapter 88 - Contact Information 633**

ACI US .....	633
Automated Solutions Group .....	633
Business Network, Inc. ....	634
DataCraft .....	634
EDO Communications .....	634
Mathemaesthetics .....	635
MDG Computer Services .....	635
Pacific Data Management .....	636
RKP Software .....	636
Soft Solutions, Inc. ....	636
