

The 4D Web Companion

David Adams

TABLE OF CONTENTS

Welcome

1	About this Book	3
	Overview	3
	Terminology	5
	Special Symbols Used in this Book	5
	Versions Covered	5
	About the Demonstrations	6
	About the 4D Code	7
	About the HTML	8
	About the Web Site	8
	Contact Information	9
2	The One-Minute Guide to 4D Web Development	11
	Introduction	11
	Tips for All Developers	11
	Advice for 4D Developers New to Web Development	11
	Advice for Developers New to 4D	12
	Advice for WebSTAR Users	12
	Advice for IIS Users	12

4D Web System Architecture and Tools

3	4D Web System Architecture	15
	Introduction	15
	Where Is the Data?	15
	Where Is the Application Code?	17
	How Is the HTML Built?	19
	Where Is the HTML Stored?	20
	How Is the Web Server Integrated?	21
4	4D Web Tools	23
	Introduction	23
	4D's Contextual Mode	23
	The 4D Web Assistant	25
	4D Semi-Dynamic Tags	26
	Active4D	27
	A Web Server Built with ITK	28
	Lasso-4D	29
	Integrating 4D with Another Web Server or System	31
5	The Native 4D Web Server	33
	Introduction	33
	Contextual Mode	33
	Non-Contextual Mode	35
	Semi-Dynamic Pages	35

Table of Contents

6	The 4D Web Assistant	37
	Introduction	37
	A Quick Tour	37
	Configuration	40
	Advantages	40
	Disadvantages and Limits	41
7	Active4D	43
	Introduction	43
	Active4D Code	43
	Flow of Control	44
	Advantages of Active4D	44
	Disadvantages of Active4D	46
	Security and Configuration Concerns	47
	Tips	48
8	4D and CGI	49
	Introduction	49
	Understanding CGI	49
	Calling CGI Programs through 4D	50
	Special Note: Calling CGIs from 4D Code	52
	Calling 4D as a CGI	52
9	Integrating 4D with WebSTAR	55
	Introduction	55
	Feature Overview	56
	Calling 4D from WebSTAR: Tools Overview	56
	WEBINCLUDE	57
	4D Web Server Request Handling	58
	Response Page Templates	60
	4D Connect and 4DSSI	61
	Security	63
	The Welcome Plug-in	65
	Monitoring and Debugging WebSTAR 4D Systems	68
10	Integrating 4D with Windows Web Servers	71
	Introduction	71
	4DISAPI Versus NPH-CGI4D	71
	Mechanics: Special URLs for 4DISAPI and NPH-CGI4D	72
	Security	74
	Supported Request Types	74
	Request Headers	75
	4ISAPI and NPH-CGI4D Responses	75
	Monitoring and Debugging	75
	Other Ways of Integrating Windows Web Servers and 4D	77
11	Integrating 4D with Other Systems through HTTP	79
	Introduction	79
	Overall Concept: Creating a Custom API	79
	Examples	80
	4D	81
	Apache	82
	PHP	84
	ColdFusion	85
	IIS	85
	WebSTAR	87

Feature Overview

12 4D Web Server Chain of Events	91
Introduction	91
Understanding 4D HTML Tag Categories	91
Chain of Event Summaries	92
Requesting a Standard URL	93
Using a Link	93
Requesting an Image	94
Submitting a Form	95
Semi-Dynamic Tags	97
Related Chapters with More Information	98
13 Web Feature Summary	99
Introduction	99
Web Commands and Database Methods	99
4D HTML Request Keywords	100
Magic URLs	101
Database Parameters	101
Semi-Dynamic Tags	102
14 Web Processing Steps and 4D Features	103
Introduction	103
The Overall Web Serving Process	103
Making the Request	103
Receiving and Dispatching the Request	104
Analyzing the Request	105
Setting the Response	105
Processing the Response	106
15 4D Request Keywords Compared	107
Introduction	107
Summary	107
4DACTION	108
4DSCRIPT	109
4DCGI	109
4DMETHOD	110
16 On Web Connection	111
Introduction	111
Basic Rules for On Web Connection	111
Structuring the Code in On Web Connection	113
Unknown URLs	114
Contextual Mode Requests	114
4DCGI Calls	114
Non-Contextual Mode	
17 4DACTION	117
Introduction	117
Mechanics	118
Returning Information from a 4DACTION Method	119
Chain of Events	120

Table of Contents

18 4DCGI	123
Introduction	123
Mechanics	123
Chain of Events	124
4DCGI and On Web Connection	126
19 Handling HTML Forms	127
Introduction	127
Form Handling	127
Defining an HTML Form	128
4DACTION versus 4DCGI	129
Compiler_Web	131
20 Uploading Files	135
Introduction	135
An HTML File Upload Form	135
What Happens when the User Submits the Form	137
Limits and Risks	138
21 Magic URLs	139
Introduction	139
4DBLANK	139
4DCACHECLEAR	140
4DHTMLSTATS	140
4DSTATS	141
4DWEBTEST	142
Security	142

Semi-Dynamic Pages

22 Semi-Dynamic Pages Overview	145
Introduction	145
Semi-Dynamic Tag Summary	146
Semi-Dynamic Pages Are Pure HTML	146
Serving Static and Semi-Dynamic Pages	147
Semi-Dynamic Pages and Web Processes	147
23 Working with Semi-Dynamic Pages	151
Introduction	151
Mechanics	151
Semi-Dynamic Tag Categories	153
Special Notes	157
24 4DSCRIPT	159
Introduction	159
Mechanics	159
Chain of Events	161
When 4DSCRIPT Works	161
Rules for Semi-Dynamic Callbacks	162
Special Command Restrictions	162

25 4DVAR and 4DHTMLVAR	163
Introduction	163
Mechanics	163
4DVAR versus 4DHTMLVAR	167
Using 4DVAR and 4DHTMLVAR	168
Limitations and Cautions	170
Special Note: BLOBs and TEXT Resources	172
26 4DIF, 4DELSE, and 4DENDIF	173
Introduction	173
Mechanics	173
Special Notes and Suggestions	174
Limitations and Cautions	176
27 4DLOOP and 4DENDLOOP	179
Introduction	179
Mechanics	179
Looping through an Array	180
Looping through a Selection	181
Looping Based on a Method	181
Nesting Loops	182
Special Notes	185
28 4DINCLUDE	187
Introduction	187
Mechanics	187
Special Content Handling	188
Replacing 4DINCLUDE	189

Contextual Mode

29 Contextual Mode Overview	195
Introduction	195
Contextual Mode's Basic Features	195
Problems with Contextual Mode	197
Appropriate Uses for Contextual Mode	199
30 Working with Contextual Mode	201
Introduction	201
Contextual Mode Fundamentals	201
Automatic Object Translation	203
Building Forms for the Web	205
Customizing Output Forms	206
Customizing Incoming or Outgoing HTML with AP SET WEB FILTERS	208
Creating Image Maps in Contextual Mode	208
Embedding Custom HTML and JavaScript	208
Developing in Contextual Mode	210
Contextual Mode and Specific Commands	210
31 4DMETHOD	213
Introduction	213
Mechanics	213
Chain of Events	214

Table of Contents

32 Automatic Image Maps	215
Introduction	215
Basic Setup	215
Clickable Images and Web Browsers	217
Important Limitation	217
33 AP SET WEB FILTERS	219
Introduction	219
AP SET WEB FILTERS Background	219
Example	221
Tips and Warnings	222

Security

34 4D Web Security Options	227
Introduction	227
Password Options Settings	227
On Web Authentication	229
Use Passwords	230
Include 4D Passwords	230
Generic Web User	230
Log Request	232
35 On Web Authentication	235
Introduction	235
Basic Rules for On Web Authentication	235
About HTTP Basic Challenge-Response Authentication	239
Managing 4D Database Access from the Web	240
Custom Log-on Forms	241
Using HTTP Basic Authentication	242
Filtering Method Calls with On Web Authentication	242
36 Secure Socket Layer (SSL)	245
Introduction	245
Why Use SSL?	245
4D and SSL: Summary	246
Preparing the 4D Web Server to Use SSL	247
Configuring the 4D Web Server for SSL	251
About SSL	252

Working with Images

37 Serving Pictures	257
Introduction	257
Serving Pictures in Contextual and Non-Contextual Modes	257
Image Request Syntax	258
How Picture Serving Works on the Web	258
About Browsers and Pictures	261
Serving Pictures in 4D Non-Contextual Mode	262

38	Converting Pictures	265
	Introduction	265
	Background: Picture Formats	265
	QuickTime	265
	Web-Oriented Picture Conversion Commands	266
	4D 6.7 Picture Commands	267
	Advanced Picture Manipulation with QPix	269
39	Special Picture Techniques	271
	Introduction	271
	Serving Pages and Images from Different Machines	271
	Reducing Image Size	272
	Preventing Caching Problems with Dynamic Pictures	274
	Passing Information between Processes or Servers with Pictures	275
	Manipulating Pictures with 4D Picture Math	275
 HTML and Web Development		
40	HTML and Web Resources	279
	Introduction	279
	On-Line Resources	279
	Books	280
41	Designing for the Web	283
	Introduction	283
	Navigation	283
	Help Doesn't	283
	Know the Audience	283
	Be a User	284
	Users Matter	284
	The Clock Is Ticking	285
	Use Data-Driven Solutions	286
	Work with Others	286
42	Integrating 4D with Dreamweaver and GoLive	287
	Introduction	287
	The HTML Editor Integration Process	287
	GoLive	288
	Dreamweaver	291
	Special Notes	294
43	HTML Tips and Suggestions	295
	Introduction	295
	Respect the Medium	295
	Use Cascading Style Sheets	295
	Use a Standard HTML Version	296
	Format the HTML Source	296
	Use Comments	297
	Use a Visual Editor and a Text Editor	297
	Avoid Frames by Default	297
	Use Color Tastefully	298
	Adapt Images for the Web	299
	Avoid Gratuitous Animation	300
	Understand How Tables Work	300

Table of Contents

44 HTML Form Tricks and Traps	301
Introduction	301
Fields May Be Hidden	301
Password Fields Obscure what Is Typed	302
Fields May Be Submitted in any Order	302
One Form May Have Multiple Submit Buttons	303
Select Objects May Send Multiple Values for One Field	303
Unselected Items Are not Submitted	304
Documents May Be Uploaded	305
45 Working with Paths	307
Introduction	307
Web Roots	307
Relative and Absolute Paths	308
The Base Tag	310
The Host Header Tag	312
HTML Editors	314
46 MIME	315
Introduction	315
Web Browser Requests	315
Web Server Responses	315
Web Browser File Mapping	316
Web Form Upload Fields	316
MIME Types	316
47 HTTP Fundamentals	319
Introduction	319
General Features of HTTP	319
Anatomy of HTTP Requests and Responses	321
HTTP Requests	323
Responding to a Web Page Request	326
 Debugging and Error Handling	
48 Custom Error Pages	331
Introduction	331
Background	331
Handling Errors in On Web Connection	333
Customizing 4D's Default Response	334
49 Preventing and Handling Errors	337
Introduction	337
Handle Errors Gracefully	337
Reduce Errors by Using 4DCGI instead of 4DACTION	338
Limit Direct Object References	338
Track Errors with On Web Connection	339
Trap Errors with ON ERR CALL	339
Compile Defensively	339
Test Early, Test Often	341
50 Debugging Network Problems	343
Introduction	343
Ping: Testing the Connection between Two Machines	343
Trace Route: Testing the Connection Path	344
Name Lookup: Testing that DNS Is Working	345

51 Debugging HTTP	347
Introduction	347
Stream Capture	347
Packet Capture and Analysis	351
4D Web Techniques	
52 Virtual Paths	355
Introduction	355
The Technique	355
Using 4DCGI instead of 4DACTION	356
Managing Bad URLs	356
Filtering Forbidden Keywords with On Web Authentication	357
Using Virtual Paths Selectively	357
53 Custom Magic URLs	359
Introduction	359
Implementing Magic URLs	359
Custom Magic URLs for System Administrators	361
Custom Magic URLs for Other Applications	362
54 Referring to 4D Objects Indirectly	363
Introduction	363
Adding an Abstraction Layer	363
Abstraction and 4D Tags	365
Methods	366
4D Functions in Expressions	367
55 Web Process Initialization and Deinitialization	369
Introduction	369
Background Review	369
Initialization Using Compiler_Web	370
Initialization Using On Web Authentication	370
Recommended Strategy	372
Deinitialization Strategy	373
Controlling Initialization and Deinitialization from the Web Page	375
56 Parsing Requests	377
Introduction	377
Data Provided with Requests	377
Running Parsing Code	378
Web Core Database Setup for Initialization	381
Parsing Example	382
Request Line	382
Header Fields	383
Cookies	383
User Name and Password	383
Form Data	384
4DSCRIPT Callbacks	385
URLs	387
URL Encoding and Decoding	388
String Commands and Regular Expressions	389

Table of Contents

57 Regular Expressions	391
Introduction	391
Regular Expressions in 4D	391
Tips for Working with Regular Expressions	391
Regular Expression Example	392
More Regex Ideas	392
58 Reusing Existing Code on the Web	393
Introduction	393
Possible Solutions	393
Writing Wrapper Routines	394
59 Rewriting DOCUMENT TO BLOB	397
Introduction	397
Open Document's Read-Only Mode	397
60 Reusing Page Elements	399
Introduction	399
Alternatives for Inserting Text	399
Deciding How to Reuse HTML	400
Storing HTML in 4D	402
61 Managing State	405
Introduction	405
Elements of State-Management	405
Storing State Data	407
Coordinating State Data	410
State Data Expiration	411
62 Using 4D as an Internet Client	415
Introduction	415
4D Internet Commands and ITK	415
Background: TCP/IP Streams	417
Acting as a Web Client	418
Sending and Receiving Email	421
Uploading and Downloading Files with FTP	424
Ping, Name Lookup, and Other Internet Utilities	425

Feature Reference

63 Web Settings	429
Introduction	429
Summary	429
Connections	430
Web Server Publishing	432
Default HTML Path	434
Mode Settings	435
Security	436
Conversions	437
Cache	440
Memory	440

64 Compiler Requirements Summary	443
Introduction	443
On Web Authentication	443
On Web Connection	444
Methods Called by 4DMETHOD	444
Methods Called by 4DSCRIPT	445
Methods Called by 4DACTION	445
4DCGI	446
4DIF	446
Variables Used with 4DVAR and 4DHTMLVAR	447
4DLOOP	447
4DINCLUDE	447
 65 4D 6.7 Web Feature Changes Summary	 449
Introduction	449
4D Web Assistant	449
Picture Commands	449
New and Improved Semi-Dynamic Tags	450
Encryption and Security Commands	450
Web-Specific Commands	451

Table of Contents
